ŞİRKET PROFİLİ

Türkiye merkezli faaliyet gösteren firmamız; mimari projeler, iç mekân tasarımları, yat üretimi, lüks araç detayları ve özel tasarım uygulamalar için yüksek kaliteli dekoratif paslanmaz sac tedariki sağlamaktadır.

Lider Dekoratif Paslanmaz;

Ayna (mirror) yüzeyler

Satine ve fırçalı yüzeyler

PVD kaplama renkli paslanmazlar

Özel desenli ve kabartmalı yüzeyler

Lazer kesim ve projeye özel uygulamalar

gibi geniş ürün yelpazesi ile müşterilerine sınırsız tasarım özgürlüğü sunar. Güçlü tedarik ağı ve çözüm odaklı yaklaşımıyla, her projeye özel üretim ve hızlı teslim avantajı sağlayan firmamız; kalite standartlarından ödün vermeden, müşteri memnuniyetini her zaman ön planda tutmaktadır. Lider Dekoratif Paslanmaz, estetiği metalle buluşturarak yaşam alanlarına değer katmaya devam etmektedir.

STAINLESS STEEL WATER RIPPLE SHEET (PARAMETER)

MATERIALGRADE	SUS 304,SUS 316L
THICKNESS	(0.6-2.0)MM
THICK TOLARANCE	+/- 5%
WIDTH	<= 1500MM
LENGTH	<= 5500mm
STANDARD SIZE	1000*2000mm, 1220*2440mm, 1220*3048mm/ 1500*3000mm or other customizable size
PATTERN DEPTH	0.5mm-4mm
SURFACE	No.8 mirror
COLORS	silver, gold, rose gold, champagne, copper, blue
APPLICATION	facade, wall cladding, ceiling, lobby, furniture
DELIVERY TIME	8-21days
PACKAGING AND DELIVERY	Protective film+ Waterproof paper + Strong sea-worthy wooden package

WATER RIPPLE SERIES

Water Ripple Design: water wave effect occurs after stainless steel surface being polished and pressed with large mold by ten thousand tons pressure CNC equipment, with the help of light refraction, surrounding reflections, creates a superb visual effect, it is suitable for hotel lobby, corridor, canopy ceiling, interior wall, facade.

Material thickness: 0.6mm-2.0mm, width within 1500mm and max-length is 5500mm. We are the first company who designed water wave series metals. There is not repeat pattern in the whole area and the design is natural, smoothly. The space atmosphere lasts a long time. There won't be visual fatigue.

PROCESSING TECHNOLOGY

In order to keep the appearance of ceiling and wall smoothly naturally, the shape of each pattern sheet we designed is usually different. The pattern of water ripple must not be repeated, and panels jointing are natural. All surfaces.

Dimension

The maximum production size is 1500mm*5500mm, which can be divided and jointed randomly according to the field size.

Colors

Champagne, gold, black, rose gold, copper, bronze, blue, etc. or customized colors.

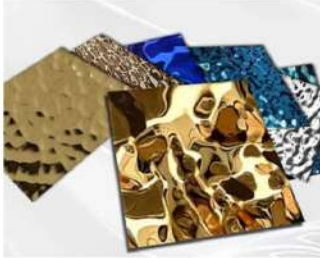

Plate Thickness

Production thickness is 0.6mm-2.0mm, interior application: 0.8, 1.0, 1.2, 1.5, thickness is 1.5 and 2.0.

Panels Jointing

Installation splicing mode can be square, staggered joint, triangle, diamond, geometric splicing mode. Seamless jointing, seam-retaining patched, etc.

Sheet Metal Processing

Various installation structures can be customized made according to site environmental requirements. We can bend, laser cutting air outlet, repair outlet, muffler hole, art modeling hole, and weld and grind.

PROCESSING CAPACITY

The fabrication procedure of textured metal panel: laser cutting, V-cuttingbending, curvy shaping, welding, polishing. Installation type: seamless jointing, seam-jointing.
